7. Literatur

Alphabetisches Verzeichnis

Abkürzungen der am häufigsten zitierten Zeitschriften:
Brit. Ass.: British Association for the Advancement of Science
C.R.: Comptes Rendus hebdomadaires des Séances de l´Académie des Sciences, Paris.
Crelle: Journal für reine und angewandte Mathematik (Crelle´s Journal)
Encyclopädie: Encyclopädie der mathematischen Wissenschaften. Teubner,
    Leipzig (1907-1914).
KdV´95: Acta Applicandae Mathematicae $\underline{39}$ (1995), Proceedings "KdV´95" Amsterdam,
    23.-26.4.1995. Eds.: Michiel Hazewinkel, Hans W. Chapel, Eduard M. de Jager.
Kluwer Acad. Publ., Dordrecht 1995.
Phil. Mag.: The London, Edinburgh and Dublin Philosophical Magazine
Pures & Appl.: Journal de Mathématiques Pures et Appliquées
Roy. Soc.: Royal Society of London, Proceedings.
Z.P.: Zeitschrift für Physik

[ACB 1777] D´Alembert, le Marquis de Condorcet, l´Abbé Bossut: Nouvelle expériences sur
            la résistence des fluides. Paris 1777
[Airy 1845] George Biddell Airy: Tides and waves. Encyclopaedia Metropolitana $\underline{5}$ (1845)
            241-396.
[AKNS 1973a] Mark J. Ablowitz, David J. Kaup, Alan C. Newell, Harvey Segur: Method for
            solving the Sine-Gordon Equation. Physical Review Letters $\underline{30}$ (1973) 88-90.
[AKNS 1973b] - : Nonlinear-Evolution Equations of Physical Significance. Physical Review
            Letters $\underline{31}$ (1973) 125-127.
[AKNS 1974] - : The Inverse Scattering Transform - Fourier Analysis for Nonlinear
            Problems. Studies in Applied Mathematics $\underline{53}$ (1974) 249-315.
[And., Ibr. 1979] Robert L. Anderson, Nail H. Ibragimov: Lie-Bäcklund Transformations in
            Applications. Siam, Philadelphia 1979.
[Are., Bon. 1965] F. T. Arecchi, R. Bonifacio: Theory of Optical Masers Amplifiers. Journal
            of Quantum Electronics $\underline{1}$ (1965) 169-178.
[Aub., Dae 1983] S. Aubry, P. Y. LeDaeron: The discrete Frenkel-Kontorova model and its
            extensions I. Exact results for the ground states. Physika 8D (1983) 381-422.
[Bäcklund 1874] Albert Victor Bäcklund: Einiges über Curven und Flächentransformationen.
            Lund Universitets Arsskrift, Afdelningen för Mathematik ochNaturwetenskap:
            För År 1873 $\underline{10}$ (1873-4) 1-12.
[Bäcklund 1876] - : Über Flächentransformationen. Math. Ann. $\underline{9}$ (1876) 297-320.
[Bäcklund 1880] - : Zur Theorie der partiellen Differentialgleichungen erster Ordnung.
            Math. Ann. $\underline{17}$ (1880) 285-328.
[Bäcklund 1882] - : Zur Theorie der Flächentransformationen erster Ordnung. Math. Ann.$\underline{19}$
            (1882) 387-422.

[Bäcklund 1883] - : Om ytor med konstant negativ krökning. Lund Universitets Arsskrift19, 6 (1883) 1-48.

[Basset] A. B. Basset: A treatise on hydrodynamics. Dover. (Welche Auflage K & dV 1895 vorgelegen hat, weiß ich nicht.)

[Bazin 1962] Henri Emile Bazin: Expériences sur les ondes et sur la propagation des remous. C.R. $\underline{55}$ (1862) 353-357.

[Bazin 1965] - : Recherches expérimentales sur la propagation des ondes. Mémoires présentés par divers savants a l´Académie des Sciences de l´Institut Impérialde France, Sciences Mathematique et Physique, $\underline{19}$ (1865) 495-644.

[Beaufoy 1814] Marc Beaufoy: Annals of Philosophy $\underline{3}$ (1814) 42-50.

[Beaufoy 1822] - : Annals of Philosophy, New Series $\underline{3}$ (1822) 276-289.

[Beltrami 1866] Eugenio Beltrami: Sagio d´interpretazione della geometria non euclidia. Giornale di Mathematiche ad uso degli Studenti delle Università Italiane, Battaglini,Napoli $\underline{6}$ (1866).

[BEMS 1971] A. Barone, F. Esposito, C. J. Magee, Alwyn C. Scott: Theory and Applications of the Sine-Gordon Equation. Rivista del Nuovo Cimento $\underline{1}$ (1971) 227-267.

[Ber., Kar. 1964] Yu. A. Berezin, V. I. Karpman: Theory of nonstationary finite-amplitude waves in a low density plasma. Soviet Physics JETP $\underline{19}$ (1964) 1265-1271.

[Ber., Kar. 1967] - : Nonlinear evolution of disturbances in plasma and other dispersive media. Soviet Physics JETP $\underline{24}$ (1967) 1049-1056.

[Beth, Wou. 1946] H. J. E. Beth, W. Van der Woude: Levensbericht von D. J. Korteweg(31 Maart1848 - 10 Mai 1941). Jaarboek Koninklijke Nederl. Akad. van Wetenschapen,Amsterdam 1945-46.

[Beutler 1993] Roland Beutler: Entartete Lösungen der Enneper- (sine -Gordon) und dersinh-Gordon-Gleichung. Dissertation MPI für Metallforschung, Institut für Physik,Stuttgart 1993.

[Bianchi 1879] Luigi Bianchi: Ricerche sulle superficie a curvatura constante e sulleelicoidi. Tesi di Abilitazione. Annali di Scuola Normale Superiore Pisa $\underline{1,2}$ (1879) 285-340. Ferner: Giornale di Mathematiche $\underline{17}$ (1879).

[Bianchi 1880] - : Über Flächen mit konstanter negativer Krümmung. Math. Ann. $\underline{16}$ (1880) 577-582. Dieser Artikel ist eine kurzgefaßte Übersetzung von [Bianchi 1879], die er bei seinem Studienaufenthalt in München bei Felix Klein verfaßte.

[Bianchi 1886] - : Agiunte alla memoria "Sopra i sistemi tripoli orthogonali diWeingarten". Annali di Math. (2) $\underline{14}$ (1886) 115-130

[Bianchi 1892] - : Sulla transformatione di Bäcklund per le superficie pseudosferiche. Rendiconti Accademia Nazionale dei Lincei (5) $\underline{1}$ (2. Sem. 1892) 3-12.

[Bianchi 1894] - : Lezioni di Geometrica Differentiale. Spoerri, Pisa 1894.

[Bianchi 1899] - : Sulla nuove transformationi delle superficie a curvature constante. Rendiconti Accademia Nazionale dei Lincei (5) $\underline{8}$ (1. Sem. 1899) 484-489.

[Bianchi 1910] - : Übersetzung von [Bianchi 1894] Max Lukat: Lehrbuch derDifferentialgeometrie, Teubner, Leipzig 1899. 2. Auflage: (Wurde um die Theorie derBäcklundtransformation erweitert) 1. Band: Pisa 1902, 2. Band: 1903, 3. Band: 1909. Einige wichtige Stellen des Originals fehlen in der deutschen Übersetzung der 2.Auflage von Max Lukat; Teubner, Leipzig 1910 [Mel., Ste. 1994].

[Bianchi 1915] - : Sisteme tripli ortogonali. Opere, $\underline{3}$, Roma 1955.

[Bishop 1979] A. R. Bishop: Solitons in Condensed Matter Physics. Physica Scripta $\underline{20}$ (1979) 409-423.

[Blaschke 1945] W. Blaschke: Vorlesungen über Differentialgeometrie, I: Elementare

Differentialgeometrie; § 96. 4. Aufl. Springer, Berlin 1945.

[Blij 1978] F. van der Blij: Some details of the history of the Korteweg-de Vries Equation. Nieuw Archief voor Wiskunde (3) 29 (1978) 56-64.

[Bobenko 1994] Alexander I. Bobenko: Surfaces in terms of 2 by 2 matrices. Old and newintegrable cases. In. Harmonic Maps and Integrable Systems. Eds.: Allan Fordy, John C. Wood. Vieweg 1994. 83-128.

[Bön., Sch. 1984] Dirk Böndel, Hans Werner Schütt: Der Stand der naturwissenschaftlichen Forschung im britischen und französischen Schiffbau in der zweiten Hälfte des 18. Jahrhunderts. Technikgeschichte 51 (1984) 3-13.

[Bonnet 1865] Ossian Pierre Bonnet: Mémoire sur la théorie des surfaces applicables sur une surface donnée I. Journal de l´École Imperiale Polytechnique 24, Cahier 41(1865) 209-230

[Bonnet 1867] - : Mémoire sur la théorie des surfaces applicables sur unes urface donnée.Journal de l´École Imperiale Polytechnique 25, Cahier 42(1867) 1-151.

[Borda 1767] Borda: Mémoires de l´Académie des Sciences, (1767) 495.

[Bour 1857] Edmond Bour: Sur la résolution des équations numériques du troisième degré au moyen de la règle à calcul. C.R. 44 (1857).

[Bour 1862a] - : Théorie de la déformation des surfaces. Journal de l´École Imperiale Polytechnique 19 Cahier 39 (1862) 1-148.

[Bour 1862b] - : Mémoire sur l´integration des équations différentielles de la ligne géodesique sur une surface quelconque. Journal de l´École Imperiale Polytechnique 19 Cahier 39 (1862) 149-191.

[Bourne 1835] A. Bourne: On the Resistance of Liquids to Solid Bodies moving in them. American Journal of Science 28 (1835) 231-236.

[Boussinesq 1871a] Joseph Valentine Boussinesq: Théorie de l´intumescence liquide appelée onde solitaire ou de translation, se propageant ...   C.R. 72 (1871) 755-759.

[Boussinesq 1871b] - : Théorie générale des mouvements qui sont propagés dans un canal rectangulaire horizontal. C.R. 73 (1871) 256-260.

[Boussinesq 1872] - : Théorie des ondes et des remus qui se propagent le long d´un canal rectangulaire horizontal, en communiquant au liquide contenu dans le canal des vitesses sensiblement pareilles de la surface au fond. Pures & Appl. (2) 17 (1872) 55-108.

[Boussinesq 1873] - : Addition au Mémoire sur la Théorie des ondes et des remus qui se propagent le long d´un canal rectangulaire etc.Pures & Appl. (2) 18 (1873) 47-52.

[Boussinesq 1877] - : Essai sur la théorie des eaux courantes. Mémoires présentés par divers savants à l`Académie des Sciences en 1872, Bd.23, 1877.

[Buch., Ger 1991] K. Buchner, A Gerold: Solitonen und Pseudospären. Differential Geometry. In honor of R. Rosca, 1991. (Siehe auch [Ger., Buch. 1991].)

[Bullough 1988] Robin K. Bullough: "The Wave" "Par Excellence", ... An Early History of the Solitary Wave. In: Solitons. Introduction and applications. Ed.: M. Lakshmanan. Springer, Berlin 1988.

[Bull., Cau. 1980] Robin K. Bullough, P. J. Caudrey: The Soliton and Its History. In: Solitons. Topics in currend physics, 17. Eds.: Robin K. Bullough, P. J. Caudrey. Springer 1980, 1-64.

[Bull., Cau. 1995] - : Solitons and the Korteweg-de Vries Equation: Integrable Systems in 1834-1995. In: KdV´95 193-228.

[Bur., Bur. 1935] J. M. Burgers, W. G. Burgers: Koninklijke Nederl. Akad. van Wetenschapen, Afd. Natuurkunde,Verhandlingen 15 (1935) 3.

[Bur, Cha 1922] Joseph Langley Burchnall, T. W. Chaundy: Commutative ordinary

differential operators. London Mathematical Society. Proceedings 21 (1922) 420-440.

[Bur, Cha 1928] - : Commutative ordinary differential operators. Roy. Soc. A 118 (1928) 557-583.

[Bur, Cha 1929] - : A set of differential equations which can be solved by polynomials. Roy. Soc. 30 (1929-30) 401-414.

[Caligny 1842-72] Anatole de Caligny: Extraits des Procès Verbaux des Séances de la Société Philomatique de Paris (5) 7 (1842) 39, 63, 95, 99, 115; (5) 8 (1843) 45; (5) 11 (1846) 136; (5) 16 (1851) 79; (6) 9 (1872) 89, 116.

[Caligny 1843] - : Expériences sur la formation de l´onde solitaire. Bulletin de la Société Philomatique de Paris (1843). (Auch in [Caligny 1866] abgedruckt.)

[Caligny 1844] - : Expériences sur l´onde solitaire et sur l´onde de translation des corps flottants. C.R. 19 (1844) 978-980.

[Caligny 1848] - : Expériences sur une nouvelle espèce d´ondes liquides... Pures & Appl. 13 (1848) 91-110.

[Caligny 1866] - : Expériences diverses sur les ondes en mer et dans les canaux, etc., ... Pures & Appl. (2) 11 (1866) 225-265.

[Catalogue 1909] Royal Society London: Catalogue of Scientific Papers 1800 - 1900, Subject Index. Band II, Mechanics, (Thema 2480 bisThema 2500). Cambridge University Press 1909.

[CGEB 1973a] P. J. Caudrey, J. D. Gibbon, J. C. Eilbeck, R. K. Bullough: Exact Multisoliton Solutions of the Self-Induced Transparency and Sine-Gordon Equations. Physical Review Letters 30 (1973) 237-238.

[CGEB 1973b] - : An N-Soliton Solution of a Nonlinear Optics Equation derived by a General Inverse Method. Lettre Al Nuovo Cimento 8 (1973) 775-779.

[CGT 1964] R. Y. Chiao, E. Garmire, C. H. Townes: Physical Rewiev Letters 13 (1964) 479.

[Challis 1833] James Challis: Report on Hydrodynamics. Brit. Ass., Reports 1 (1833) 131-151.

[Clairin 1900] Jean Clairin: Sur une transformation de Bäcklund. Bulletin des Sciences Mathematiques (2) 24 (1900) 284.

[Clairin 1902] - : Sur les transformations de Bäcklund. Annales scientifiques de l´École Normale Superieure (3) 19 (1902) Suppl., 1-63.
